Subject: Fwd: Support of SB 324

I wanted to testify today but cannot due to a family medical issue today.

Perhaps it can be noted that Willamette Valley Transport was able to displace 750 gallons of gasoline with propane- which is a cleaner, more economical fuel. I was able to save approximately \$2500 per year per vehicle after converting to propane from gasoline.

This year I plan to convert 2 more vehicles to run on propane. (adding to the 14 already converted) I am able to do this due to the savings accrued from converting in past years. Please show Willamette Valley Transport's support of SB 324!

Thanks,

--
