

I am very concerned that this bill will would not allow me to sell or trade a gun with a friend. It would require me to go to a licensed gun dealer just to get a background check on the person. I have a concealed weapons permit so I have already been checked and I would not sell to a questionable person. In-fact, I will not sell to anyone without recording their diver's licence and other personal information. I feel this will interfere with my second amendment rights.

The fines and penalties for this bill are outrageous. This bill will not effect/interfere with the illegal sale of guns to criminals but restrict the rights of law abiding citizens.

I also feel this will lead to a national registration of guns and individuals.

Please reconsider passing this bill, you are taking our second amendment rights away from us.
