

I would like to make known my opposition of SB 941 and the process the Judiciary Committee is proceeding to push the bill through so rapidly. As a member of the EMS and Law Enforcement community I do not see this bill as an impact to gun control but a violation of second amendment rights. This will not keep our streets safer. This is not a representation of the majority of the people. Our state government needs to focus more on education and mental health than continued failed gun control policies.
