

Hello, my name is Dietrich Harms

The following issues with SB 941 have yet to be addressed:

1. Requiring even \$10 to acquire a firearm/exercise ones 2nd Amendment rights strikes me as a poll tax and unconstitutional.

**What would you think about a requirement of a \$10 license to protest on the street?**

**Start a church/synagogue/mosque?**

**Write on a blog?**

2. The ATF Form 4473 asks 2 questions that are at odds with civil rights and Oregon values.

Questions 10a asks the transferee whether they are Hispanic or Non-Hispanic. Question 10b asks the transferee to identify their ethnicity.

**Why these questions asked? Is there something wrong with being Hispanic?**

3. ATF Form 4473 question 11e asks if the transferee if they are a user of marijuana.

Medical cannabis use has long been legal and recreational use will be legal in July.

**How will medical and recreational users exercise their federal and state constitutional rights to acquire firearms?**

4. How will this law be enforceable without a complete firearms owner to firearms serial number registry?

**There will be no practical way to enforce this law in a way to actually prevent felons from buying firearms. It has been said by SB914 proponents that there are no plans for a firearms registry.**

5. The last time I purchased a firearm form an FFL, the wait time for the background check was over 2 hours and I could not leave the store during. From what I understand this is due to the strained resources of the Oregon State Police. Many people are inexplicably delayed even longer.

**"A right delayed is a right denied" - Martin Luther King Jr.**

Thank you
