

I like to ask you to keep Oregon free from non-sense. I moved out of CA because it was too late to fight for our rights in CA.

on 8/15/13 in Los Angeles I had a false accusation against me and court gave me a protective/restraining order based on a lie. It took me 4 months of legal battle to make City Attorney, Emily Chasalow, to take a look at my case and my proofs that I was innocent, when she saw that I was willing to go to trail, she noticed that she would lose this case in court and she dropped the charges.

3 months after the whole case was thrown out, Los Angeles Police came to my house to confiscate my guns. I was not home and asked my lawyer to talk to them, but they were so rude with him. My lawyer explained to them that the case was finished and I was allowed to own firearms but they did not care. Finally City Attorney was involved and they backed off.

Do you want the same thing to happen for you, when you did not do any crime but some one on street ( in my case it was a street vendor who lied and put me to jail because I asked them not to disturb us) can lie so easy and put you in jail and court can strip you from your firearms with a protective order and give you 24 hours to surrender your guns to Police without Do Process or trail?

City Attorney, Chasalow, took a while to admit that I was innocent even though I had the incident recorded on my cell phone, she finally did when she saw I was ready to fight back and win it in court trail.

I filed the "seal and destroy the case" with court since I proved to City Attorney with the video tape from the incident that I was factually innocent. Now I have it signed by the judge.

Now lets think that if I did not have a video to prove I was innocent, now I was in jail!  
The Judicial system is not perfect and we cannot let something like this to be normal in Oregon.

If you let this happen to Oregonians the Anti-Gun prosecutors would try to convict innocent people of crime that they did not commit, just to disarm them from their 2nd amendment rights. And that is happening with the Domestic Violence cases across America today. About a million Americans lose their rights for ever every year with accusations like they only pushed their wives.

Other troubling thing is that if a woman accuses her partner of Domestic Violence, her partner gets a Restraining Order before he is found guilty, and he would be found guilty even if he only pushed her. If he is innocent, it is very hard to prove that he did not push his partner.

Also there is no punishment for people who lie to authorities. In my case DA understood that my accuser lied but DA did not do anything against the liar.

The Anti-Gun activists found a way to disarm Americans with Misdemeanor, but before American only would lose their rights if they were convicted of felony. Years ago felons had the rights to protect themselves and their families at home, but now they have no rights even at their homes.

I do not think in any part of constitution says that if you push your wife you shall not bear arms!

Please stop SB941.
