It is estimated that by 2033 the Earth would have gotten up by 2 degree. That's mean that we humans need to act fast. HB 3250 will help slow or even stop the rapid climb.

I am a 15 year old African American girl that will grow up on this planet for the rest of my life, as will your kids there kids and there kids well around the time huge crisis will begin. Climate change is not just going to go away. It is a problem that will challenge every single human or the Earth to fight and win the biggest fight of the human race. A fight no one, thing, or being can risk losing.

I, your kids, and their kids ask you to think about the future of the world and take the first steps to stoping climate change. HB 3250 is that step.
