Subject: Testimony in support of HB 3250

Dear Members of the House Energy and Environment Committee,

It would be easy for you to ignore one more testimony. I'm going to make it easy for you. I need your help. Oregonians need your help. Americans, and the rest of the world... we need policy makers like yourselves to take action. This bill is the best solution I've seen to deal with the immense problem of climate change.

Because it doesn't increase government, it has the power to gain widespread support and become a model for other states and federal policy. It would do what needs to be done to drop emissions at a rate that avoids a critical 2-degree rise in global average temperatures.

We don't have time to push this issue out to a future date. We need to take action, and HB 3250 is exactly the right kind of action.

Sincerely,

Dune Thomas

Ashland, OR
