Testimony in regards to bill SB 941

To the law makers of the State of Oregon:

I would like to voice my opposition to the proposed bill SB 941. I have read the bill carefully and it clearly is nothing but a further infringement on our second amendment rights. This bill will not have the slightest impact in the reduction of crime or in keeping guns out of the hands of criminals. Criminals certainly won't obey by this law and won't go through a back ground check before purchasing a firearm, just as they don't obey other laws.

The only purpose of this law is to further infringe on the rights of law abiding citizens, to make gun ownership harder and to discourage private guns sales. It clearly is a further effort by the Democrat party to take all personal responsibility away from the private citizen and hand it over to the State, and it appears with the ultimate goal to control every aspect of our lives. The ultimate goal of the people who push bills such as SB 941 is to disarm the population; it is as simple as that. Once this bill passes they will focus on the next bill and progress towards their ultimate goal.

It appears the only loop hole this bill intends to fix is the State gun registry. If the FFL dealer would truly be the only custodian of the gun purchase records, why would the State police ask for the serial number and brand of the firearm in first place, when a back ground check is being administered?

The US Government is the largest gun dealer in the world. Not it's citizens. Your efforts are misdirected.

Sincerely,

Reto Buehler
