

Your voting to close my restaurant down and to end thousands of jobs . The state of Oregon is headed the wrong direction with this bill. This not only effects the people on minimum wage but everyone above it. State of Oregon employees with their masters degree are making that much less now. My cooks will want more money because of the wage increase and seeing the waitstaff making over \$35 an hour with their tips won't help. We don't have a tip credit included in anything that's been proposed!!!! Cost of goods across the board will take dramatic increases. Processing plants will close their doors and move to other states where they can stay competitive and sell their goods. High school students looking for part time work will not find any. Senior citizens with fixed income will have drastic changes to make to stay afloat. Your killing small business . This will destroy the heart of the state. I'm begging you to stop this insanity!
