Subject: vote YES on SB 197

As one of your constituents, I ask you to represent me by voting YES on SB 197. The destruction of ground and river water is inevitable with a CAFO. I specifically do not consume dairy or cow products because of the environmental damage caused by such large factory farms. I also chose to move to Oregon six months ago, because of the Oregon principle to sustain the environment for current and future generations. Again, I urge you to vote YES on SB 197.

Sincerely,

Carrie Cassada
