

Please support HB 2739. We must stop the spread of GMO crops and the poisoning of our lands by millions of pounds of pesticides. Agriculture in the US is being destroyed by companies like Monsanto and the health of our environment and of people is also being destroyed. I eat and grow organics and I am appalled by the growth of unhealthy and lethal foods being sold to people on the US. Don't let Oregon agriculture be destroyed. Call a halt to the damage being done by big industry.
