

I support Oregon House Bill 3228 because our state should recognize the intrinsic value of all wildlife, including wildlife that is not hunted, fished, and trapped. I agree that we should protect, maintain, and restore indigenous non-game wildlife to their natural place in our state, thus improving and restoring ecosystem functions and providing long-term benefits and beauty to Oregon.

I am a resident of Wilsonville, Oregon (97070).

Cordially,
Anne Smith
