I can only hope some of you legislators have ownership in some type of business that sells a product and the government puts price controls on your shoes, lettuce, books or what ever it is you market to the public. I have worked hard and increased the mortgage on my principal residence to buy a couple duplexes to try to get ahead. Now if you pass this bill my return on investment will probably decrease substantially.

I would expect this bill to actually decrease the growth of rental housing. I know I wouldn't have taken the step had I known this was coming.

See you at the voting booth.
