

I write in support of HB2017-3. Daily I observe people in our community who rely on LTD to get from their homes to stores, doctors, etc. This summer I will be 87 years old. Though recently tested (and passed) for driving skills, I see the day in the future that I will turn to alternative methods to go from one place to another. Taxis are expensive and when you have plenty of time (one of the benefits of being retired) mass transit is the answer. I ask you to support this vital piece of legislation.
