

Last week I lost my Mom due to complications of severe pneumonia.

In her final days, tube feeding supplemented her limited ability to eat. Mom's wish was to end her days at home and her choice to continue with the tube feeding gave her strength to transition to home under Hospice care and precious days for us to enjoy each others' presence before she departed this life.

That's why I'm asking you to vote NO on HB 4135.

We were pleased to honor our mother's wishes and thankful for legal protection to do so. Please preserve this same right for Oregonians by saying NO to HB4135.

Respectfully,
Celeste Henry
