

## OREGON CARBON POLICY OFFICE

### Resources available from Carbon Policy Office

February 1, 2019

The Legislature created the Carbon Policy Office in 2018 (HB 5201) to conduct research, analysis, and stakeholder engagement to inform a statewide policy framework to grow Oregon's economy while achieving Oregon's greenhouse gas reduction goals.

Over the interim between sessions, the Carbon Policy Office has provided research and analysis to Legislators on carbon pricing policy design. The product of that work is made available on the website [carbonpolicy.oregon.gov](http://carbonpolicy.oregon.gov).

#### Available on [CarbonPolicy.Oregon.Gov](http://CarbonPolicy.Oregon.Gov):

- [Supporting research and reports](#) from 2018, including:
  - Outside analysis of emissions intensive, trade exposed industries and how to avoid leakage
  - Economic analysis of cap and trade programs and analysis of market design options
  - Oregon emissions data and explanation of how Oregon measures greenhouse gas emissions
  - Work group products focused on low income utility customers and opportunities for GHG reduction and adaptation on natural and working lands
  - Scientific research publications on climate change
- [Explanatory and summary material](#) compiled to reflect LC 894 as drafted by the Joint Committee on Carbon Reduction.
