

Dear Sir or Madame,

I strongly oppose Bill HB 3063 or any mandatory vaccine bills. I believe parents should retain their rights to refuse vaccinations without being coerced, and I believe all children should have access to an education regardless of vaccination status.

The American Medical Association website clearly states that Informed Consent for medical procedures is fundamental in both law and ethics.

“Informed Consent

Code of Medical Ethics Opinion 2.1.1

Informed consent to medical treatment is fundamental in both ethics and law. Patients have the right to receive information and ask questions about recommended treatments so that they can make well-considered decisions about care. Successful communication in the patient-physician relationship fosters trust and supports shared decision making.”

I cannot financially homeschool, I have to work to support my son. That is not an option for many of us. If we want our children to stay in school, then we would have **NO CHOICE** but to vaccinate. This is not informed consent to medical procedure, this is coerced. We would be forced to vaccinate and put our children at risk, because every vaccine carries a risk and documented potential side effects, according to the CDC(3):

- Seizures
- High fever, above 105*
- Permanent brain damage
- Deafness
- Joint-pain
- Pneumonia
- Encephalitis
- Meningitis
- Death

The state nor any government own our bodies or our children’s bodies.

All children in the United States have the right to go to school and not be discriminated against.

I urge you to reconsider, as this will harm more than it will help. This Bill will be taking away our rights to informed consent and our children’s rights to free public education.

Medical freedom without coercion is fundamental in America.

Thank you for your time and consideration,
