

I am against mandatory vaccines. As adults and parents, we should have the medical right to decide whether or not we want medical intervention at any time.

How dare you take away our freedom to decide for ourselves and our children. A vaccine is not one size fits all. As you would know when it comes to almost anything you do.

Vaccines can contain many chemicals

vaccines may contain many of the following chemicals, excipients, preservatives and fillers:

- * aluminum hydroxide
- * aluminum phosphate
- * ammonium sulfate
- * amphotericin B
- * animal tissues: pig blood, horse blood, rabbit brain,
- * arginine hydrochloride
- * dog kidney, monkey kidney,
- * dibasic potassium phosphate
- * chick embryo, chicken egg, duck egg
- * calf (bovine) serum
- * betapropiolactone
- * fetal bovine serum
- * formaldehyde
- * formalin
- * gelatin
- * gentamicin sulfate
- * glycerol
- * human diploid cells (originating from human aborted fetal tissue)

- * hydrocortisone
- * hydrolyzed gelatin
- * mercury thimerosal (thimerosal, Merthiolate(r))
- * monosodium glutamate (MSG)
- * monobasic potassium phosphate
- * neomycin
- * neomycin sulfate
- * nonylphenol ethoxylate
- * octylphenol ethoxylate
- * octoxynol 10
- * phenol red indicator
- * phenoxyethanol (antifreeze)
- * potassium chloride
- * potassium diphosphate
- * potassium monophosphate
- * polymyxin B
- * polysorbate 20
- * polysorbate 80
- * porcine (pig) pancreatic hydrolysate of casein
- * residual MRC5 proteins
- * sodium deoxycholate
- * sorbitol
- * thimerosal
- * tri(n)butylphosphate,
- * VERO cells, a continuous line of monkey kidney cells, and
- * washed sheep red blood

and, reports that mercury thimerosal causes severe neurological and immunological damage,

some vaccines have been found to have been contaminated with Simian Virus 40 (SV 40) and that SV 40 is causally linked by some researchers to non-Hodgkin's lymphoma and mesotheliomas in humans as well as in experimental animals.
