Subject: HB 3063
Date: Wednesday, February 27, 2019 10:19:35 AM

State Legislatures,

I am writing to oppose HB 3063. As a new mother and as a Christian I am saddened that such a bill would even be considered. As parents, we must be allowed to make medical decisions for our children, and every child should have the right to education regardless of their medical history. Mandating any medical procedure is a gross overstepping of the government and an infringement on our constitutional rights. It directly infringes on Oregon children's right to a "free, appropriate, public education" as required by the IDEA.

Under no circumstance should a medical procedure be mandated, and that goes especially for vaccines. Vaccine inserts tell us they've never been tested for carcinogenic or mutagenic potential, or ability to impair infertility. Vaccines are not tested against a true inert placebo like saline. The current CDC vaccine schedule has never been tested as a whole to see if 72 vaccines from birth to 18 years old, is safe. Vaccine manufacturers can not be held liable for any injuries resulting from their products. You can not mandate a medical procedure or product when there is no liability!

As a Christian, knowing that aborted fetal cells are used in the making of some vaccines absolutely sickens me and goes against my very strong beliefs in God. God does not condone the killing of these babies and He certainly does not condone using those babies for medical procedures and then injecting them (even just trace amounts) in to our bodies. This alone is reason enough to oppose this bill. You cannot force people to go against their religious beliefs. It goes against everything this country stands for.

These are just a few of the reasons vaccines should never be mandated, whether it be for children or adults. Where there is a risk, there must be a choice!! 72 vaccines on the current CDC schedule. Who is to say that won't increase? What happens when it becomes 80? Or 90? Or 100? When is enough enough? What happens to our children? Once you open this door, you can't close it.

I strongly urge you to oppose HB 3063.

Thank you!

Julie Steinbrink
