Subject: No to HB 3063
Date: Wednesday, February 27, 2019 2:11:19 PM

Hello,

I am writing to tell you that I oppose HB 3063, the bill to end all non-medical vaccine exemptions for Oregon schoolchildren.

I am a concerned citizen and mother of two children ages 6 and 4 years old. My children are currently under Religious exemption and in a public charter school that is based out of our home and yet we still are blessed to have an assigned teacher and field trips with other local children in this charter school system.

If this were to pass we would be forced to move from Oregon since BOTH my children are genetically predisposed to autism and cannot be immunized, and YET no "modern Dr." will consider their genetics and the advances in science behind genetics, to be enough of a medical reason to not vaccinate them or protect them under medical exemption. Science is NOT stagnate, the more we learn about genetics, predisposition to diseases, and autoimmunity/mental disorders should **ABSOLUTELY** be a considering factor in who vaccines are safe for and who they are not safe for.

There has NEVER been a double blind saline placebo controlled study done on vaccine safety. Never. This is a process that ALL other pharmacy drugs must go through. The following link is proof for the previous statement, all attached sources come directly from the FDA and CDC themselves.

http://icandecide.org/wp-content/uploads/whitepapers/ICAN%20Reply%20-%20December%2031%2C%202018.pdf?fbclid=IwAR0cKRUVungjqC9cYBrYJNsZBuglSku9iqo_cFva5ACzHlVgeLcX6EqT2s

I am not anti vaccine, I am not pro vaccine. I am Pro medical freedom and freedom of choice. It is our American right to have the freedom of choice in raising our children. Vaccines are NOT a one size fits all medicine, what one vaccine/dose might benefit one child that same vaccine/dose can injure or kill another. Approving and mandating vaccines without proper safety studies and rigorous analysis is dangerous.

7.5% of kindergarteners file an exemption form, they could be exempt from ONE vaccine, not ALL vaccines. Most of them will continue to vaccinate at a later date. Only 2.7% of Oregon schoolchildren currently hold a philosophical or religious exemption, meaning that scientifically we already have high community immunity to disease. Therefore, there's no reason to take away parental rights to those using non-medical exemptions.

The measles cases since January of 2019 in Oregon is 4. Three of which were confirmed to have stayed home during their infection and held NO RISK of public exposures.

Measles cases still happen even when vaccine rates are at their peak. The chart from the CDC shows that this current outbreak of measles is not out of the norm for the disease. And in fact they admitted that the strand of measles that was being

spread in fact was the strand from the vaccine itself. So those who were newly vaccinated were the cause for the spread of the disease.

Please, again I ask you to oppose this bill in preservation of our American rights to FREEDOM of medical choice. Social media outlets are banning, erasing and censoring anything that goes against pro vaccination. This is CENSORSHIP, the start of DICTATORSHIP and is NOT the American way we all have been blessed to be a part of.

What if this was about a different topic such as abortion?! What if abortion information was being censored or they made all abortions banned and made illegal their would be a HUGE uproar and riots/movements due to lack of medical freedom/choice!

This is hypocritical.

If you are OK with mandating the medical rights of people and are for this bill, remember this moment when you gave away women, children and families freedom of medical choice...when a future bill comes around to wipe out a freedom you are passionate about.

Again is is not "pro or anti" vaccine, this is simply about our Americans rights to live in Freedom.

Thank you for your time,

Keisten Hayes
