

**SB 884 STAFF MEASURE SUMMARY**

**Senate Committee On Environment and Natural Resources**

---

**Prepared By:** Beth Patrino, LPRO Analyst

**Sub-Referral To:** Joint Committee On Ways and Means

**Meeting Dates:** 3/5

---

**WHAT THE MEASURE DOES:**

Authorizes qualified institutions to apply for a loan from the Water Pollution Control Revolving Fund to finance projects to repair or replace failing on-site septic systems or to replace failing on-site septic systems with connections to an available sewer. Defines "qualified institution" to mean a non-profit organization registered to operate in Oregon that is certified as a community development financial institution by the Community Development Financial Institution Fund at the US Department of Treasury.

**ISSUES DISCUSSED:**

**EFFECT OF AMENDMENT:**

No amendment.

**BACKGROUND:**

A septic system is the most common method of sewage treatment for homes and businesses that are not connected to an area-wide sewage treatment system. Over 30 percent of Oregonians rely on septic systems to treat wastewater from their homes and businesses. Septic systems which fail or malfunction can pollute Oregon's land and waterways with raw sewage and create public health hazards.

The Oregon Clean Water State Revolving Fund provides low-interest loans to local governments for the planning, design and construction of wastewater treatment facilities, implementation of non-point source pollution management plans, and the design and implementation of estuary management plans. Since the program began in 1988, nearly four hundred communities have benefited from more than a billion dollars of infrastructure investments.

Senate Bill 884 would authorize qualified institutions to apply for a loan from the Water Pollution Control Revolving Fund to finance projects to repair or replace failing on-site septic systems or to replace failing on-site septic systems with connections to an available sewer.
