

Dear Oregon Legislators,

My name is Amber Christensen, and I live in Grants Pass Oregon. I oppose HB3063 and ask that you will oppose as well. Here is why...

I know the main goal in passing this bill is to protect those who are vulnerable in our community. However, this bill strips away the right to public education for another group of children who are vulnerable to vaccine injury.

A 3 year long Harvard study proved that only 1-10% of vaccine injuries are actually being reported to the current reporting system.

When looking at the numbers, this means that anywhere between 30,000 to 450,000 people are having serious adverse reactions from these recommended vaccinations each year that are not being reported. That is a massive amount of injury going unrecognized.

Our government agencies are not conducting research to find out why so many children are having these serious negative reactions. This needs to happen so that we can give proper medical exemptions to those who need them. Thus, our religious and personal belief exemptions are currently the only thing we have to allow our children access to public education, while using our discretion to protect them from the dangers that vaccines pose.

I urge you to OPPOSE this bill at the hearing this Thursday because one child's life is not any more important than the next. A parent and their child should not be coerced into a medical procedure, that our government has ruled unavoidably unsafe, in order to access free, public education. Please STOP HB3063 at the hearing this Thursday!

Harvard Pilgram Health Care Final Report

<https://healthit.ahrq.gov/sites/default/files/docs/publication/r18hs017045-lazarus-final-report-2011.pdf>

“Adverse events from drugs vaccines are common, but under reported... Likewise, fewer than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of ‘problem’ drugs and vaccines that endanger public health. New surveillance methods for drug and vaccine adverse effects are needed.”

Thank you for your time,

Amber Christensen
