---

Dear Committee members,

Please oppose/withdraw HB 3063. This proposed legislation represents a extreme GOVERNMENT OVERREACH into PRIVATE healthcare matters. Punishing over 15,000 Oregon school children (#1) who have religious or philosophical vaccine exemptions on file, for the healthcare decisions that their parents make for them, is cruel, unethical, and violates both their civil liberties and human rights.

Government interference in private healthcare matters also violates medical informed consent laws. People have the right to make informed healthcare decisions for themselves and their families, **free from government coercion and without fear of retribution**. HB 3063 actively seeks to punish any child whose parent exercises the right to informed consent by declining even one vaccine.

Vaccines are **liability-free** pharma products that have well known and well documented adverse reactions (#2, 3, 4). Liability-free products should never be mandated using threats and intimidation for non compliance.

Taxpayer government subsidies "compensate" only 1% of vaccine injured parties according to an HHS Harvard funded study (#5).

That fact alone is a gross miscarriage of justice. It fails to adequately compensate American citizens who have been harmed by these defective, no-fault products that are 100% EXEMPT from all legal consequences.

It is your duty as a public servant to protect and defend our constitutional rights and freedoms. If you look the other way and vote to advance HB 3063 while Oregonians have their basic freedoms stripped away (due process, informed consent and a public education) by special interests then you have profoundly failed us all.

Thank you.
