I would like to voice my opposition to HB 3063. Regardless of one's stance on whether or not vaccinations are safe, I do not believe that anyone should be forced to receive a chemical substance that they do not want. Nor should parents be forced to inoculate their children.

This infringes on one's constitutional right to liberty of religion. The argument could be made that God protects from disease and therefore the usage of an immunization is an example of a lack of faith, which would be displeasing to God. For the State to force an individual to engage in such an act would be a violation of the 14th amendment.

Thank you for your time
