Subject: HB 3063
Date: Thursday, February 28, 2019 10:26:54 AM

I am writing to ask you to please say NO on HB 3063. I am deeply concerned about the loss of rights as a parent to make intuitive decisions for my children's health. I have nothing but their best interests in mind and want what is best for them as well as everyone else. This new bill is not okay and here are some of many reasons why:

- This isn't about being "pro" or "anti" vaccines. It's about keeping medical freedom, body autonomy, parental rights, informed consent and scientific integrity intact.
- Informed Consent for our children is absolutely imperative to hold onto as we are the ones who know our individual and unique child the best.
- Parents and individuals should be given informed consent and CHOICE to opt out of any and all medical procedures. There is not, and never will be, a one size fits all medical solution for every child. Which is why Informed Consent (i.e. permission granted in the knowledge of the possible consequences, typically that which is given by a patient to a doctor for treatment with FULL KNOWLEDGE of the possible risks and benefits.) is a right that must remain with the parents.
- Did you know after the Vaccine Childhood Injury Act passed, the childhood vaccine schedule skyrocketed even though there was no increase in childhood diseases?
- Did you know that in the 1980's Autism was 1 in 10,000? Did you know that in 2018 the Autism rate stood at 1 in 36?
- on the package insert of many childhood vaccines it says "has not been evaluated for carcinogenic or mutagenic potential, or the potential to impair infertility"? -which means our children are the TEST SUBJECT to see if they do or do not?
- Your bill goes directly against the medical ethics adopted by the Nuremberg Code: "The voluntary consent of the human subject is absolutely necessary"

Please vote No on this bill. Please

Sincerely,

Danika Grossnickle
