Members of the Oregon Legislature:

In the current US National Vaccine Schedule, in the first 6 years of life your child receives the following Vaccine Ingredients. Canada is no different.

Imagine injecting all this into an apple and making a child eat it? Then understand that people are injecting all this under the skin of their child. Then think about how all that below is meant to mimic a disease you catch out in nature. Can you inject health into malnourished people, using poison? It only makes sense if you don't think about it.

- 17,500 mcg 2-phenoxyethanol (Bug Repellent, some brands of Antifreeze)
- 5,700 mcg aluminum (a known neurotoxin)
- Unknown amounts of fetal bovine serum (aborted cow blood)
- 801.6 mcg formaldehyde (carcinogen, embalming agent)
- 23,250 mcg gelatin (ground up animal carcasses)
- 500 mcg human albumin (human blood)
- 760 mcg of monosodium L-glutamate (causes obesity & diabetes)
- Unknown amounts of MRC-5 cells (aborted human babies)
- Over 10 mcg neomycin (antibiotic)
- Over 0.075 mcg polymyxin B (antibiotic)
- Over 560 mcg polysorbate 80 (carcinogen)
- 116 mcg potassium chloride (used in lethal injection to shut down the heart and stop breathing)
- 188 mcg potassium phosphate (liquid fertilizer agent)
- 260 mcg sodium bicarbonate (baking soda)
- 70 mcg sodium borate (Borax, used for cockroach control)
- 54,100 mcg of sodium chloride (table salt)
- Unknown amounts of sodium citrate (food additive)
- Unknown amounts of sodium hydroxide (Danger! Corrosive)
- 2,800 mcg sodium phosphate (toxic to any organism)
- Unknown amounts of sodium phosphate monobasic monohydrate (toxic to any organism)
- 32,000 mcg sorbitol (Not to be injected)
- 0.6 mcg streptomycin (antibiotic)
- Over 40,000 mcg sucrose (cane sugar)
- 35,000 mcg yeast protein (fungus)
- 5,000 mcg urea (metabolic waste from human urine)
- Other chemical residuals - including thimerisol - a mercury compound - mercury is the 3rd most toxic substance found anywhere to date, on the planet.
