

Representatives-

I write to you today as a concerned Citizen for our freedom. I do support giving up any of my freedoms as an American. This country was founded on the basis of freedom. It was founded by people coming over here trying to escape religious tyranny in Europe. The more steps we take to give up freedom the closer we follow in the steps of what 'We The People' escaped. I believe in our Bill of Rights: Peoples Rights are listed BEFORE States Rights.

This is not just about today. This is about 50 years from now. This is about 100 years from now. Give an inch take a mile. It does not stop.

I am absolutely pro-health. We have some of the sickest kids in our history: asthma, childhood diabetes, food allergies, childhood leukemia, developmental delays, ticks, ADHD, autism, lupus, arthritis, eczema, epilepsy, brain damage and the list continues. We also have some of the highest vaccine doses ever in history! We cannot say without a shadow of a doubt that there is not a link between these.

In 1986 the National Childhood Vaccine Act was passed giving absolutely no liability to pharmaceutical companies only profit for them. If a test goes wrong they can simply stop the test and not report any of their findings. As people, as citizens, we have no repercussion. We cannot even sue because of this Act. Even if we could who has the money and the resources to go against big pharmaceutical companies?

This is not to even mention all of the toxic ingredients that go into vaccines. I know that this is mainly sparked because of the MMR 'outbreak' so let's review just a couple of the ingredients in that vaccine:

- Chick Embryo Culture- animal cell lines and DNA
- WI-38 Human diploid Kung fibroblasts - Kung tissue of a 3 month gestation female fetus (aborted baby cells)
- Fetal bovine serum - fetal blood extracted from cows found pregnant at slaughter

I do not support abortion. I do not support making abortion into a big business and then injecting that dead child into myself or my children.

We cannot say that injecting DNA into ourselves or children does not cause cancer. How does our body know what specific ingredient to build antibodies against? Let's bare in mind that vaccines do not equal immunity. We only get immunity naturally: nose, mouth, lungs not an injection.

Besides aborted baby cells, cow and chick DNA some other ingredients in vaccines are: formaldehyde, aluminum, mercury (yes thimerosal is still in the flu vaccine. Yes the stuff that HAZMAT is called if a thermometer breaks), latex rubber, monosodium glutamate, phenol (used as anti-freeze) and Beta-

Propiolactone (known to cause cancer). Would you like to drink a smoothie out of these ingredients? At least then your liver would have a chance to filter out some of these toxins and not directly cross the blood brain barrier! I know that might sound a little bit gruesome but that is literally what we are injecting into our bodies. Our bodies cannot process all of this! Everyone wants to talk about the cost of this recent MMR 'outbreak' but what about the cost of all of our long-term diseases in this country!? If I don't have my health I cannot pursue happiness. I need freedom to choose what goes into my body.

Also, in regards to MMR it is a live vaccine. John Hopkins patient guide states "avoid contact with children who are recently vaccinated and tell friends and family who are sick or recently had a live vaccine not to visit." This is because live viruses shed and people can contract these viruses through that shedding. According to science there is a strong chance that the vaccinated kids and adults are the ones who are getting people sick. Live viruses include MMR, rotavirus, chicken pox, shingle and the flu. According to John Hopkins they can "shed for weeks afterward and then back to the vaccinated and unvaccinated a like."

Let's also talk about the corruption that is in the system. Julie Gerberding receipt \$3 million in stock options from Merck when she through the CDC doubled the vaccine schedule. So is this truly about health?!

There are so many more things to be said, but I believe you get my point. Please represent me, my children and our future. Help protect our Freedom.

Thank you
Ashley Goering
