

Good Afternoon,

I am writing to say that I oppose HB 3063. Currently only a small number of children (less than 2.7%) of Oregon schoolchildren use the religious and/or philosophical exemptions offered. Requiring this small percentage to become fully vaccinated before allowing them to receive education (public, private, online, charter schools, and daycares) is not acceptable. As a parent and tax paying Oregon citizen, I want all children to be given equal educational opportunities regardless of their vaccination status. I firmly believe medical issues are best left for parents and doctors to determine and the government has no place to interfere. Please uphold philosophical and religious exemptions and OPPOSE HB 3063.

Thank you,  
Justine Krogger  
Oregon Resident
