Brittany,

Please see the below table with the breakdown of percent of students with a nonmedical exemption to one or more vaccines, and percent with a nonmedical exemption to all vaccines, for Kindergarten, and Kindergarten through 12th Grade, for the past three years. Approximately half of students with an exemption have an exemption for all required vaccines.

	Grade: K	Grade: K	Grade: K-12	Grade: K-12
	% with nonmedical exemption to one or more vaccines	% with nonmedical exemption to all vaccines	% with nonmedical exemption to one or more vaccines	% with nonmedical exemption to all vaccines
2018	7.5%	4.1%	5.2%	2.6%
2017	6.5%	3.6%	4.7%	2.3%
2016	6.2%	3.3%	4.1%	2.0%
Source: Oregon Health Authority Immunization Program				

I've also attached the county by county breakdown of percent of children with a nonmedical exemption to one or more vaccines that was shared with OPB.
