

**Subject: Dear Senate members of Education Committee**

Our kids are facing unknown dangers everyday. These dangers have never been seen in the last decades as they have been seen in the last 10 years. Our young people need to know how to react when they find a firearm, how to be around firearms, and how to respect them. Derek and the Kid SAFE Foundation are making a difference in basic understanding of firearm education; the more kids they can reach, the safer all of our kids will be.

I am a huge supporter of the education that Kids SAFE Foundation has been doing over the last years. I am in full support of Senate bill 801; it'll bring this education to a wide range of Oregon's student body.

Please count me in as someone that will speak out in support of Derek LeBlanc and SB801.
