

To whom it may concern,

I write in support of SB 801. It seems to me that whether one is a supporter or opponent of gun control, ensuring that everyone is educated from a young age in firearm safety can only be beneficial. Too many tragedies occur, especially among children, through ignorance. Ensuring that children are educated in firearm safety could stop some of these tragedies from happening. I hope the Oregon Legislature will carefully consider this bill, and, seeing how positive the results could be, enact it.
