Re: Testimony in Favor of Oregon Wi-Fi Radiation Exposure bill [SB 283](#)

Dear Legislators,

As Founder of ElectromagneticHealth.org and Campaign for Radiation Free Schools, I want to express my great appreciation to Oregon State legislators for consideration of SB 283.

This Bill, calling for disclosure of the health risks of wireless technology, education on safe use of wireless devices, and for the Department of Education and the Oregon Health Authority to conduct a review of peer-reviewed independently funded studies of effects of microwave radiation in schools and other environments, and report these findings, as well as report on practices and alternative technologies that would eliminate student exposure to harmful microwave radiation, is *so very impressive*.

Bravo for your pioneering work to protect children, as well as Faculty and Administrators, too, many of whom are of childbearing age, where microwave risks to fetuses is also of very serious concern with permanent impacts on the child after birth.

I encourage this Bill be passed as soon as possible.

And when it is passed, if I can be of any help in pulling together any of the above information, please let me know.

Very truly yours,

Camilla Rees, MBA
