Subject: Large leaf blowers - relevant to 6-18 information session
Date: Thursday, June 6, 2019 3:00:04 PM

Represent Helm and committee members,

I am stating my interest in controlling large leaf blowers. In addition to excessive noise, they leave a suffocating gas odor that leads to physical discomfort. Like many people I struggle with allergies, and do not sleep well the nights I have been exposed to the dust, pollen and debris stirred up by these machines.

I believe they are a special hazard to their operators who are constantly exposed to their noxious pollution.

Please promote the legislation aimed at controlling these machines...this is a do-able goal, as we struggle with pollution issues on all fronts.
