Subject: Climate Change legislation
Date: Saturday, February 1, 2020 10:15:43 AM

I'm going to write you a very short letter with no exhaustive research examples as I'm sure you have that vast amount of information available.

PLEASE support legislation which is in favor of Carbon Offsets, and actions which support a long term sustainable environment for our grandchildren.

Put people, animals, and the earth ahead of corporate profits.

We Oregonians need to be a part of BIG change - let's do our part before it's too late - knowing unfortunately it may already be too late.

Thank you.
Gary Seelig
