To Whom It May Concern:

I have a 4-year-old granddaughter and I cannot tell you how devastating it is to know that she is going to spend her life on a planet altered forever by runaway global warming. I know enough about physics and geology that I realize how immensely serious the situation is. Earth has seen devastating carbon-based warming before, far beyond what we have now, but never, ever on this kind of timescale. In the past it's been over a scale of hundreds of thousands of years. We have no idea what's coming.

We MUST do everything we can now to slow it down.

Sincerely,

PR Griffith
The Dalles, Oregon
