**Subject:** Support for strong action to fight climate change  
**Date:** Wednesday, February 5, 2020 7:49:18 PM

---

As a rural Oregonian and a father and grandfather, I strongly urge you to protect all current and future generations from the worst of the effects of global warming and the associated climate changes by supporting a strong Cap and Invest Program for Oregon NOW. This action must be taken now while there is still the smallest of margin of time left to still act responsibly. Please do your duty as a citizen of Oregon and the United States and as a human being on this fragile planet.
