

I'm opposed to sb1530 for a number of reasons.

1. I'm offended that the Oregon legislature thinks that we as business owning, tax paying Oregonians either aren't smart enough or don't deserve the opportunity to vote on this bill. PUT IT ON THE BALLOT!
2. The only thing this bill is guaranteed to do is redistribute wealth, from hard working Oregonians to government bureaucracies. When we force businesses out of Oregon they will go to another state or even country that doesn't have the environmental protections that we have, therefore increasing the net carbon emissions and pollution.
3. It is in everyone's best interest to utilize our natural resources responsibly. This bill is about MONEY not the environment.

Please do not let this bill become law!

Thank you
