

I request that you vote no on the SB 1530. This will hurt everyone in Oregon. It will create more homeless people because people will not be able to afford their homes, electricity, fuel for there vehicles to get back and forth to work. Voting yes will shut down farms. Which produce food that people need to eat. You will shut down logging that is needed for building houses, making toilet paper, writing paper, furniture and lots and lots of other items you use everyday. You will shut down fishing, which is used for food.

Think about this also please, it says that it would phase this bill to Portland metro first the west of the cascades then the rest. And this is to help rural people. What about those of us who live in rural Lincoln County, or Benton County or Linn County. Most of us have to drive to larger cities to work buy groceries and buy fuel for our vehicles. You are not helping us, you are going to bankrupt all of us, keep us from eating, keep us from working. You are not only going to do this to all rural living adults but also to children and animals. You have no right to make people starve just because you want more money that isn't even going to help the whole climate change. We are so low on emissions now you will kill people by staring them because you took away there jobs, houses, and life-do remember you are doing this to kids as well.
